Surveyed the lake; Observed no significant growth of targeted aquatic vegetation. Past treatment working very well with the plants continuing to decompose. Observed minor sago pondweed growth, these plants are beneficial for the fisheries and if these plants become a nuisance treatment may be warranted.

LMS will return for further management.

Overall Condition: Very Good

Met and spoke with homeowner concerning management.

Comments

Surveyed the lake, observed no significant growth of targeted vegetation. Past treatments are working well.
Applied aquatic herbicide to shoreline Rip-Rap 12 foot, lake side of dam and all gavions to control the growth of Purple Loosestrife, Cattails, Phragmites and other emergent vegetation.
Circulator was not working when arrived. Turned power off in electrical panel. Inspected circulator and found that anchor lines broke off and electrical cable was tangled in anchor lines.
Untangled electrical cable from anchor lines and brought circulator to shoreline. L.M.S will return to reinstall circulator with new anchor system.
Spoke with Bill about storing circulator and re-installment.

L.M.S will return for further management.
